

Ambulatory Surgery Centers (ASCs) are highly regulated health care facilities that provide outpatient surgery and preventive care. ASCs provide excellent value through high-quality outcomes and lower cost care. New technology and techniques have made outpatient surgery safer and more comfortable: more than 80% of surgeries are now performed in an outpatient setting.

About ASC Data

ASC Data keeps healthcare suppliers at the forefront of the growing ASC market. With proprietary data sourced from reputable industry organizations and reviewed by experts in the field, ASC Data delivers targeted market intelligence to help you discover new leads, monitor industry trends and identify future opportunities.

net growth from Q1 2025

\$45.6 billion

current ASC market value

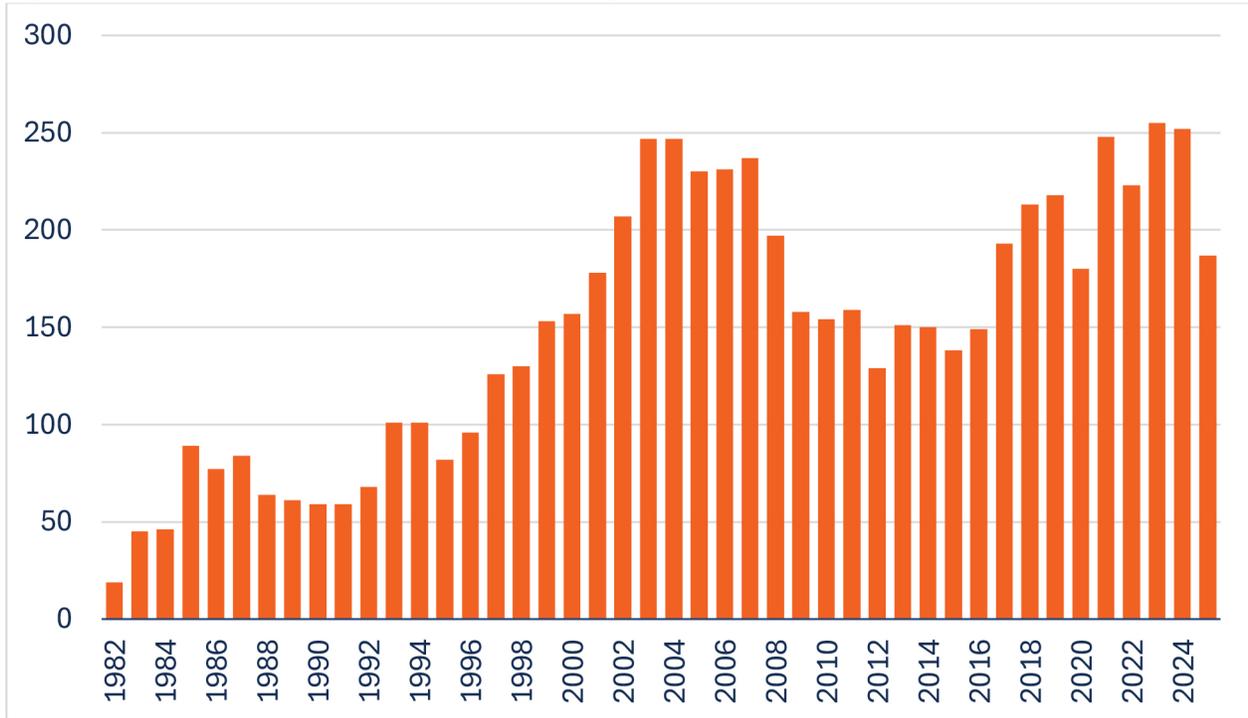

This report analyzes the current state of the Ambulatory Surgery Center (ASC) market in the United States, utilizing data from the Centers for Medicare & Medicaid Services (CMS).

ASCs continue to be a vital part of the healthcare landscape, providing high-quality, lower-cost outpatient surgical and preventive care. Advances in technology now allow more than 80% of all surgeries to be performed in an outpatient setting. And with the U.S. population aged 65 or older expected to increase to 24% by 2060, demand for these services is projected to rise—positioning the ASC market for continued growth.

Table of Contents

Number of Operating Rooms (OR)

Currently, there are 18,781 operating rooms across 6,566 Medicare certified ASCs. Consistent with state size and population, California, Florida, and Texas have the highest total number of ORs (California 2,139, Texas 1,615, Florida 1,572). Total number of ORs per state is represented in Figures 4 and 5. Figure 6 displays the distribution of ASCs by the size of the facility (determined by number of operating rooms). Table 5 lists the ASCs that had a change in the number of operating rooms from Q3 to Q4.

Average number of ORs per ASC	2.86
Average number of ORs for single specialty ASCs	2.21
Average number of ORs for multi-specialty ASCs	3.55

Figure 4. Number of Operating Rooms per State

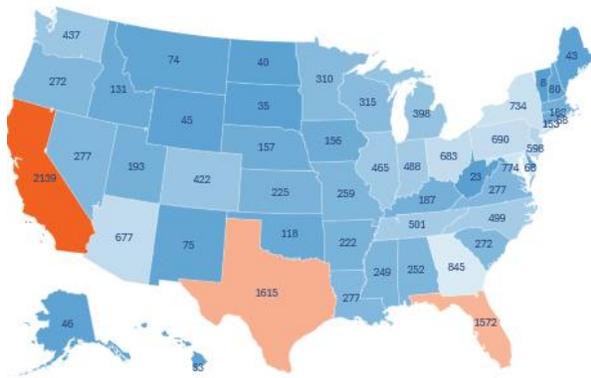

Figure 5. Number of Operating Rooms per State per 100,000 People

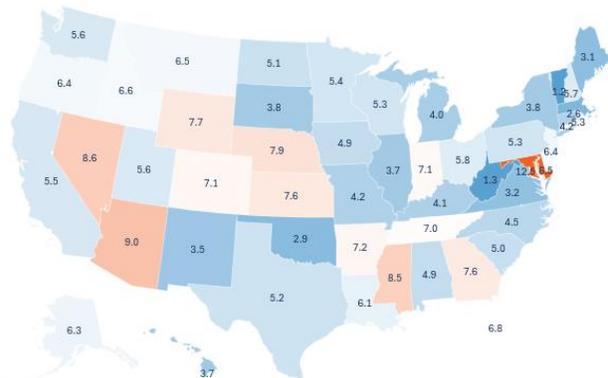

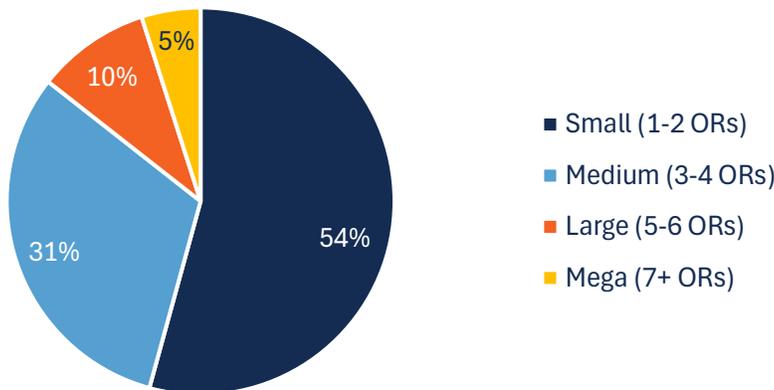

Figure 6. Distribution of ASCs by Size of Facility (Number of Operating Rooms)

Total Specialties

10 options for surgical specialties are reported for analysis. Most centers (3376, 51.4%) are a single specialty center followed by dual-specialty centers representing 13.7% (Figure 7, Table 6). Figure 8 shows how Medicare certification is tracking by specialty in 2025 compared to prior years. Figure 9 shows number of ASCs by specialty type from 2022 to 2025. Figure 10 shows number of ASCs by specialty type in 2025 and Figure 11 breaks this down by single- and multi-specialty centers.

Figure 7. Number of Medicare Certified ASCs by Total Specialties Offered

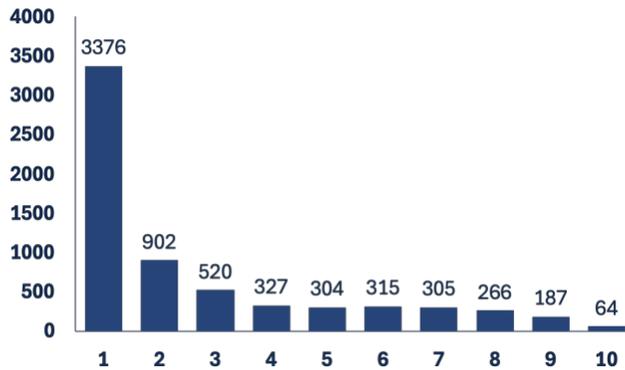

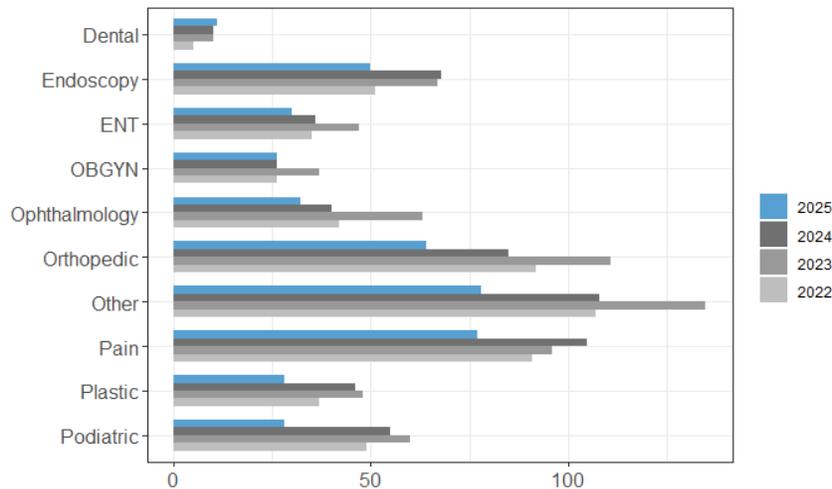

Table 6. Single vs Multi Specialty Breakdown

	Number	% of Total
Single Specialty	3376	51.4%
Multi-Specialty	3190	48.6%
3 or Less Specialties	4775	73.1%
6 or Less Specialties	5744	87.5%
7 or More Specialties	822	12.5%

Figure 8. Specialty Breakdown by Year of Original Medicare Participation

Note: "Other" typically represents General Surgery, Cardiology, Trauma, Neurosurgery, Vascular, Urology, and Pediatrics.

Figure 9. Number of Medicare Certified ASCs by Specialty from 2022 to 2025

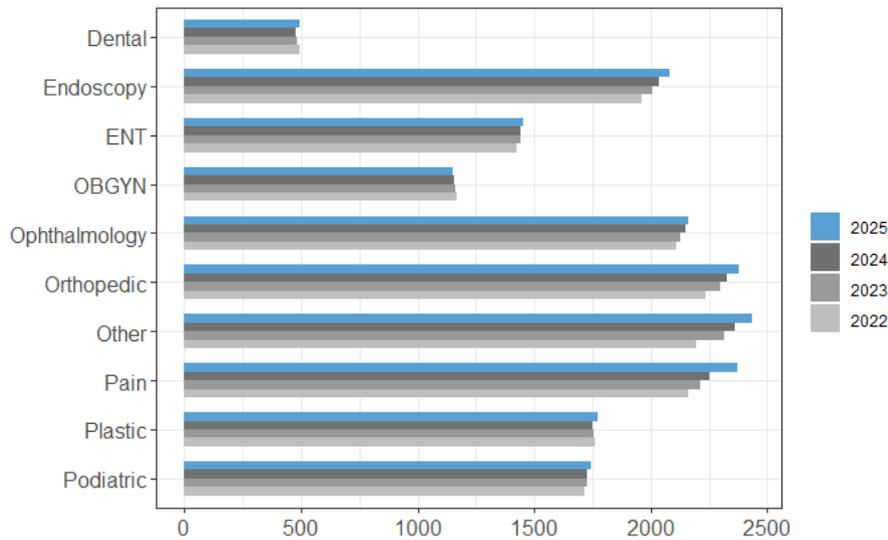

Figure 10. Number of Medicare Certified ASCs by Specialty Type in 2025

Note: Percentages will not add to 100 as some centers have more than one specialty.

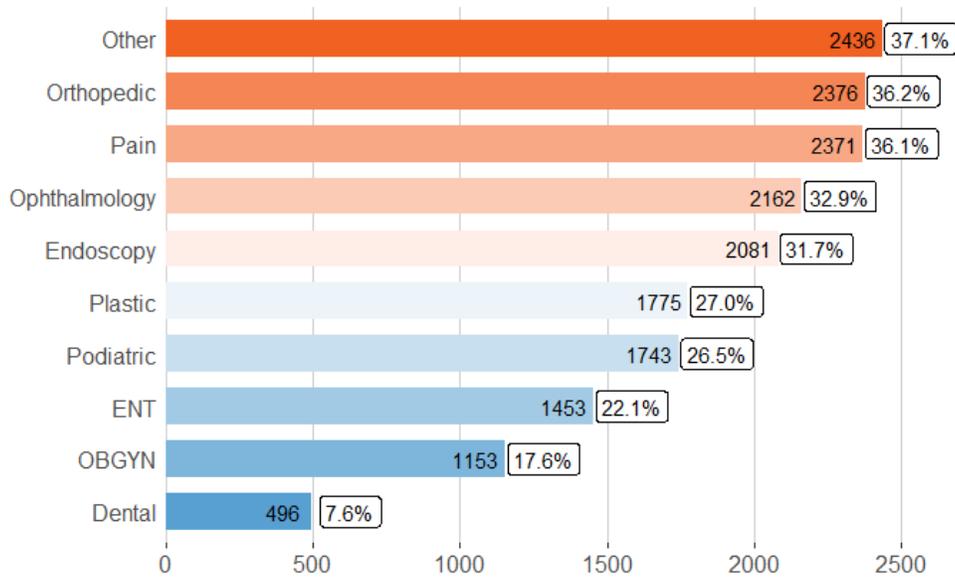

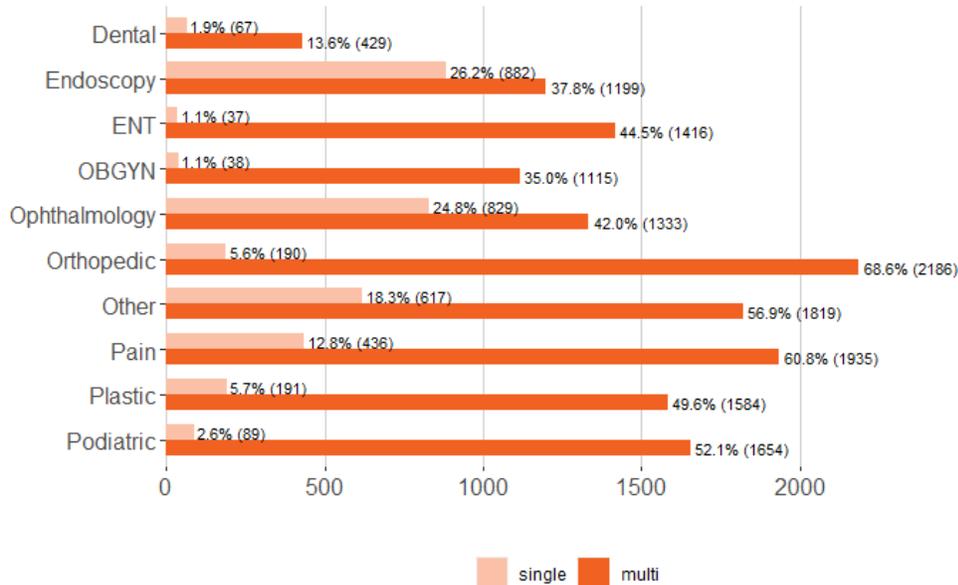

Figure 11. Number of Medicare Certified ASCs by Specialty Type for Single- and Multi-Specialty Centers in 2025

Note: Percentages will not add to 100 as some centers have more than one specialty.

Tables 7, 8, and 9 present the number of specialties per region, city, and state. The least prevalent specialty is colored blue, and the most prevalent is colored orange.

The most common (26%) single specialty center specializes in endoscopy, followed closely by ophthalmology (25%). Table 10 characterizes the top 3 most common combinations of specialties for multi-specialty centers. Table 11 shows the percentage of Medicare certified ASCs that offer each specialty by total number of specialties offered. For example, 8% of dual specialty ASCs offer ENT surgery. Lastly, Table 12 shows the changes in specialties offered per ASC from Q3 to Q4.

Table 10. Top 3 Specialty Combinations per Total Number of Specialties Offered

Table 22 summarizes the number of ASCs in each state that offer podiatric surgery. Figure 30 represents the origin of laboratory, pharmaceutical, and radiology services at ASCs that only offer podiatric surgery (n=89). Figure 31 shows how the number of ASCs that offer podiatric surgery is changing over time.

There are currently 1,743 Medicare certified ASCs offering podiatric surgery, a 2.0% increase since 2017.

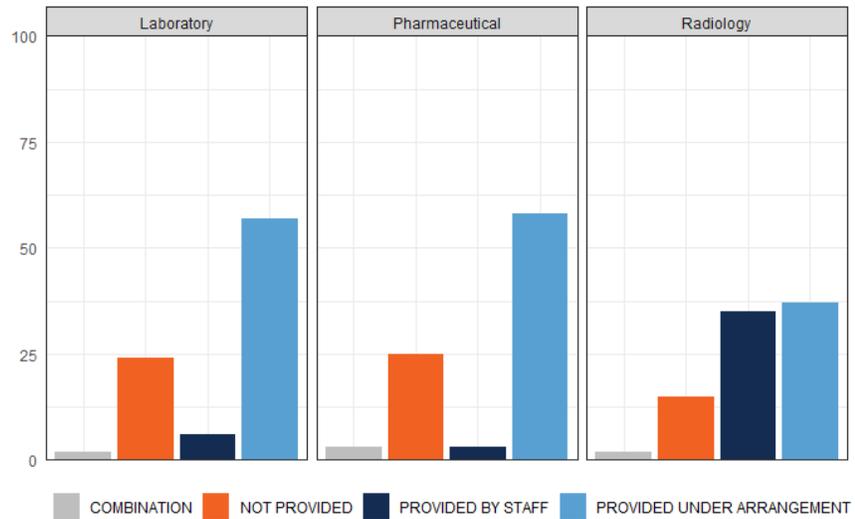

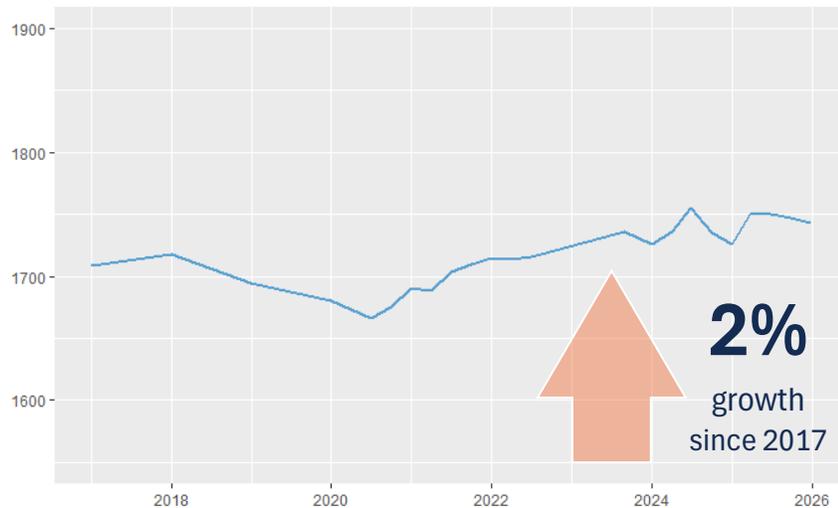

Figure 31. Number of ASCs Offering Podiatric Surgery (2017-2025)

Cardiovascular

At the end of Q4 2025, there were 263 Medicare-certified ASCs that were identified as offering cardiovascular surgery. 160 (61%) were single-specialty centers and 103 (39%) were multi-specialty centers.

The average number of specialties served at multi-specialty ASCs that offer cardiovascular surgery is 5.38, which is notably higher than multi-specialty ASCs that were not identified as offering cardiovascular surgery (average 4.57). The most common specialties offered in combination with cardiovascular are orthopedic (68%), pain (68%), and podiatric (61%).
